Only the best for your business!

PRISMA Win® Restaurant

**"Speed up sales and streamline operations
with PRISMA Win POS Restaurant!"**

Flexible Menu

Speed up your service with a touch screen menu designed specifically for your restaurants. Create and manage your own menu effortlessly.

Whether you offer table service, delivery, take away, bar, buffet, quick service, or a combination, PRISMA Win helps you serve your customers quickly and more accurately.

Table Management

Real Time graphical room and table representation with realistic visualization of your store.

See the status of your tables! Which ones are in use? Which waiters serves them? Has the bill been requested? Which tables have pending orders?

See the financials details of your rooms! How much have your customers spent? How many have been served? How much is your total revenue up to this moment!

Reservations

Quickly add, change or cancel guest reservations very simply.

Easy search for availability at the touch of a button.

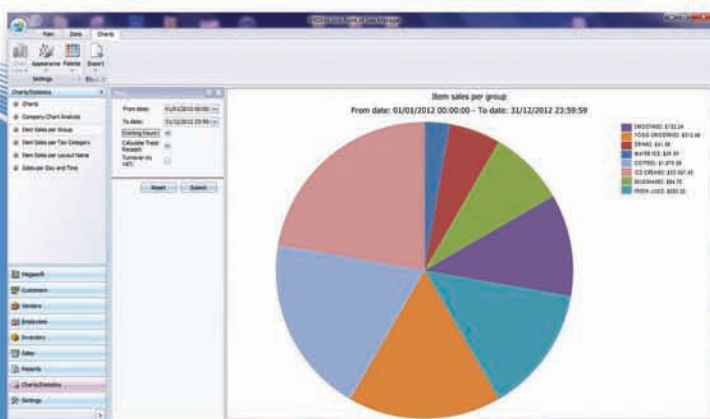

Reserve the table that your guest prefers!

Group tables together for larger groups.

Manage guest wait lists during peak periods.

Orders

Enter orders quickly with touch-screen order entry. Cover your customers needs for more choices and better service! This smart order management system informs the kitchen in real time just how your customers like their menu! No more mistakes from illegible hand written orders. At the touch of a finger the orders are routed directly from the Pos application to the Kitchen printer. PRISMA Win is easy to learn and to use for everyone from the restaurant manager to the newest staff!

Multilingual Capabilities

PRISMA Win POS applications are the ideal solutions for all restaurants with staff that don't speak 100% English.

W.g. you can print Chinese in the Kitchen for the Chinese cooks and print English on the receipt for your guests.

Display the screen interfaces in your staff's preferred language per work station since the application is adjustable to every language!

Reporting

PRISMAWin includes many standard reports that provide the sales, reservations, customer, financial, marketing, inventory and production information needed. However the restaurant manager can add custom reports to fit their business' needs and get the insights to manage and grow his business profitably.

Marketing and Promotions

PRISMA Win helps to keep in touch with your customers!
The Application offers a flexible tool to send mass mail or SMS directly to the customers in order to inform them about issues such as: Happy Hours, special prices, new products or services, parties and other events!

**Which menu do your customers prefer?
Make sure you have all the necessary ingredients!**

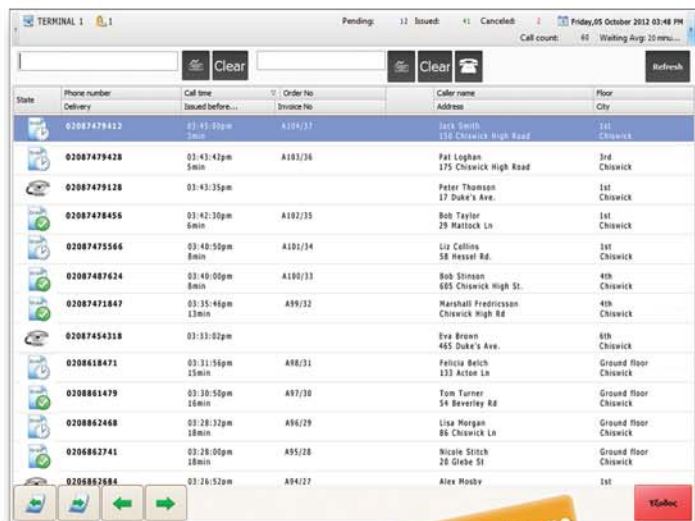

**Which are the peak hours and days?
Efficiently organize your staff and enhance them with the necessary manpower!**

**Which tables do most of your customers prefer?
Respectively configure your space!**

Who Are Your Most Loyal Customers?
Reward them with special offers!

PRISMA Win® Delivery

- Run marketing campaigns and give incentives to your customers.

Add Value to your Restaurant!

PRISMA Win® Mobile

"Impressively reduce response time!"

PRISMA Win® POS Mobile efficiently serves for wireless order taking and helps to dramatically increase the speed of customer service, since the waiter doesn't need to change room or floor to send the order. It is easy to use, requires no previous experience and can be used by any employee of your business. It contributes to all orders being executed correctly, avoiding the mistakes from illegible or incomprehensible hand written orders and eliminates unnecessary movements of the waiters to the kitchen or to the cash desk. It offers excellent management of rooms, tables, orders, accounts and provides perfect customer service and modernization of your business.

**Gain total control and respond on
time to your customers' wishes!**

PRISMA Win® POS software solutions are developed by our in house expert team of software developers and are Built On Latest Technologies. We design each of our solutions based on thorough research of the hospitality market's needs and requirements resulting to a reliable, user friendly software solution with exceptional interface. We focus on the unique demands of our customers and we support them in order to improve their competitiveness and performance. Our cooperation is based on trust, honesty and sincere communication.
